4. Once Download is completed, Click My Video Files in the bottom right corner of your Free YouTube Downloader.

- 5. Move your video file (which will be a VLC file) to your new folder (see Step 9).
- 6. Locate your .srt file (in your downloads file (special note: you can click date modified to locate current downloads)), move this file to your newly created video file (see Step 9).
- 7. Open your MP4 video found in your newly created file. Click Subtitle at the top of the screen, and choose Add Subtitle File in the drop-down menu.
